

## Readings over Chapter 5, Questions on Monday October 16

In textbook:

5.1, 5.2, 5.3, 5.4, 5.5

This chapter begins with forming conditions using equality, relational, and logical operators.

Flow of control using selection is the major topic of the chapter. If statements, if/else statements and if/else if constructs are the first examples of selection. All these statements perform tests using conditions.
